	 Silverlight' is ingesteld om voor bepaald modus te worden uitgevoerd. Plugins in toegang tot uw documenten en gegeven 	e websites in de onveilige de onveilige modus hebben s.			

Only when you see the triangle with ! next to student.commart. eu, the setting is OK.

- Updates Microsoft Silverlight: when Silverlight updates are available, an automatic message appears to install the newest version. Confirm and open the installation file from your Downloads folder. After the installation, you need to restart the browser to be able to use the module.
- Chrome for Apple does not support Silverlight (see http://www.microsoft.com/getsilverlight/Get-Started/Install/Default.aspx > System requirements). Use another browser (Safari or Firefox).
