MAINTENANCE

UMBROSA
WATER REPELLENT SPRAY

UMBROSA
MAINTENANCE KIT

- ENG** In order to **prevent stainless steel from rusting**, it is necessary to treat it frequently and preventatively. Umbrosa recommends cleaning and protecting the surface regularly. Cleaning can easily be done using standard dishwashing detergents. Afterwards, a protection layer can be applied onto the dry surface with a silicon spray. In an aggressive environment (maritime climate, chlorine, acid rain, aggressive industrial or urban environment) we recommend to clean the surface more frequently. Rust can be removed using a cloth and polishing paste. These kinds of products can be bought in do-it-yourself shops, but also in car specialty stores that sell several “stainless steel polishers”.
- NL** **Roestvast staal blijft enkel vrij van corrosie**, wanneer deze goed en preventief wordt behandeld. Umbrosa raadt bijgevolg aan om regelmatig het oppervlak te reinigen en beschermen. Reinigen kan eenvoudig met warm water met afwasmiddel zoals “Dreft”. Nadien brengt u op het droge oppervlakte een bescherm laag aan met bijvoorbeeld Silicone spray. In een agressieve omgeving (maritiem klimaat, chloor, zure regen, agressieve industriële of stedelijke omgeving), dient men de frequentie van dit preventief onderhoud op te drijven. Wanneer lichte roest zichtbaar is, dient deze te worden verwijderd met doek en speciale polierpasta. Dergelijke producten zijn te koop in Doe-het-Zelf zaken, alsook in autospecialzaken waar men verschillende “stainless steel polishers” verkoopt.
- FR** Pour **éviter que L'acier inoxydable corrode**, c'est nécessaire de traiter la surface régulièrement. Umbrosa conseille de nettoyer et protéger régulièrement la surface en utilisant l'eau chaude et un peu de détergent. Après, sur la surface sèche, vous pouvez appliquer une couche de protection avec, par exemple, un spray de Silicone. Surtout dans un environnement agressif (climat maritime, chlore, pluie acide, environnement industriel ou urbaine agressif) nous recommandons de nettoyer fréquemment la surface. Vous pouvez éliminer des éventuelles taches de rouille avec un chiffon et du cirage. Vous pouvez trouver ce type de produits dans des magasins bricolage, mais aussi dans des magasins spécialisés, ou on vend plusieurs “stainless steel polishers”.
- DE** **Edelstahl bleibt nur frei von Korrosion**, wenn dieser gut und Präventiv behandelt wird. Umbrosa empfiehlt regelmäßig die Oberfläche zu reinigen und zu schützen. Reinigung kann problemlos mit warmem Wasser mit Seife. Danach bearbeiten Sie die trockene Oberfläche mit einer Schutzschicht z.B. Silikonspray. In einem aggressiven Umfeld (Seeklima, Chlor, saurer Regen, aggressive Industrie- oder städtischen Umwelt) sollte man diese Behandlung häufig machen. Sichtbaren Rost sollte mit Tuch und spezielle Polierwerkzeuge Paste entfernt werden. Solche Produkte findet man in Baumärkten sowie in Auto Läden wo man verschiedene "Edelstahl Polierer verkauft".
- ES** **Acero inoxidable sólo permanece libre de corrosión**, cuando esta bien y se trata como una medida preventiva. Umbrosa recomienda de limpiar regularmente la superficie para y proteger. Limpieza puede fácilmente con agua tibia con jabón del plato. Luego, lleva sobre la superficie seca con una capa protectora para por ejemplo spray de silicona. En ambientes agresivos (clima marítimo, cloro, lluvia ácida, agresivo ambiente urbano o industrial), la frecuencia de este mantenimiento preventivo para arriba. Cuando el moho visible, se debe retirar con paño y pasta de pulir especial. Estos productos se venden en ferreterías, así como en tiendas de coches donde uno diferentes vende “pulidores de acero inoxidable”.
- IT** Per **prevenire l'arruginirsi dell'acciaio inox**, è necessario curarlo frequentemente e preventivamente. Umbrosa consiglia di pulire e proteggere frequentemente la superficie. E' possibile pulire l'acciaio inox con acqua calda e detergente. Dopo aver pulito la superficie, la potete proteggere applicando sulla superficie asciutta uno strato protettivo con, per esempio, lo spray al silicone. In un ambiente aggressivo (clima marittimo, cloro, pioggia acida, ambiente aggressivo industriale o urbano) consigliamo di pulire la superficie più spesso. E' possibile rimuovere possibili macchie di ruggine con uno straccio e un po' di lucidante. Questi prodotti sono disponibili in negozi fai da te, ma anche in negozi specializzati (come quelli che vendono i prodotti per pulire le macchine) che vendono vari “stainless steel polishers”.
