## **2 Safety instructions**

### *2.1 General*

Safety is a combination between measure implemented during the design and measures taken by the user of the Beachflag. The Beachflag is designed to function as a advertising product. It is designed to be safe during installation if the installation is carried out as described in this manual. The purpose of these safeguards is to prevent accidents during the expected lifetime of the beachflag.

Parts and accessories, which are not approved by the manufacturer, may result in personal injury and / or damage to the product or its functioning. Therefore, use only original parts which are specifically made for the product, and mount these parts with proper tools.

#### *Warnings and symbols*

Warning labels, such as shown below, warn the user for risks, these are risks which are by the design not or not enough be prevented, and for situations in which technical safety device not or not entirely effective.

In this manual the following symbols are used:

- Inattention may have adverse effects to people

- Not following the instructions in this manual may damage the beachflags

### *Compliance with requirements*

- Use the Beachflags only when the weather permits.
- Install the Beachflag base in a proper way to avoid dangerous situations (see manual of the various beachflag bases)
- The manufacturer is not responsible for the any damage by course of these kind of actions.
- The user must known this manual before install or using the Beachflags
- If activities are not described in this manual in all circumstances the user must contact the supplier

### *Cleaning the beachflags*

- All our Beachflags are washable
- Disassemble the Beachflag before washing
- Only wash the flag self
- Wash the flags on 30 degrees
- Clean the pole and base with a piece of non scratching fabric and water

### *2.2 Not allowed*

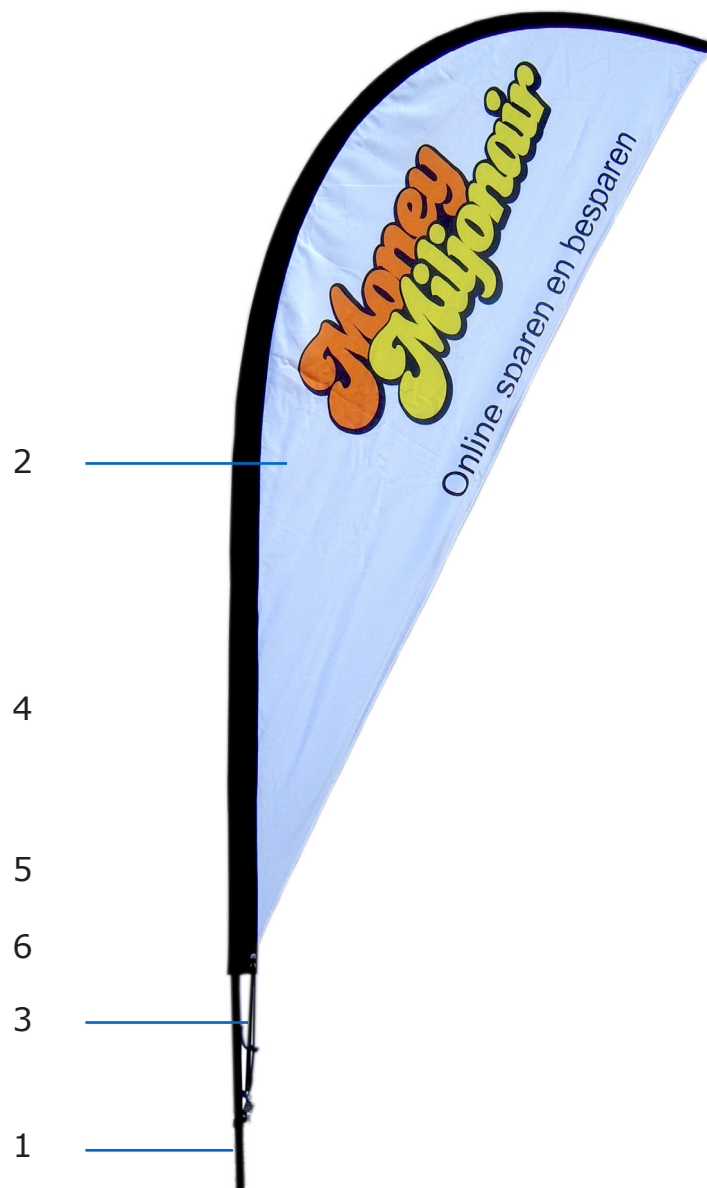

- Never use the Beachflags when the windforce is more then 5 bft (Beaufort scale)

### 3 Installation

#### 3.1 General

Before installation make sure that the Beachflag is complete. The following parts are needed for a proper installation:

1. Flag pole (4 or 5 pieces)
2. Flag
3. Cord or elastic
4. Hook
5. Clip pole
6. Bolt and nut
7. Base (optional, not shown)

## 3.2 *Installation*

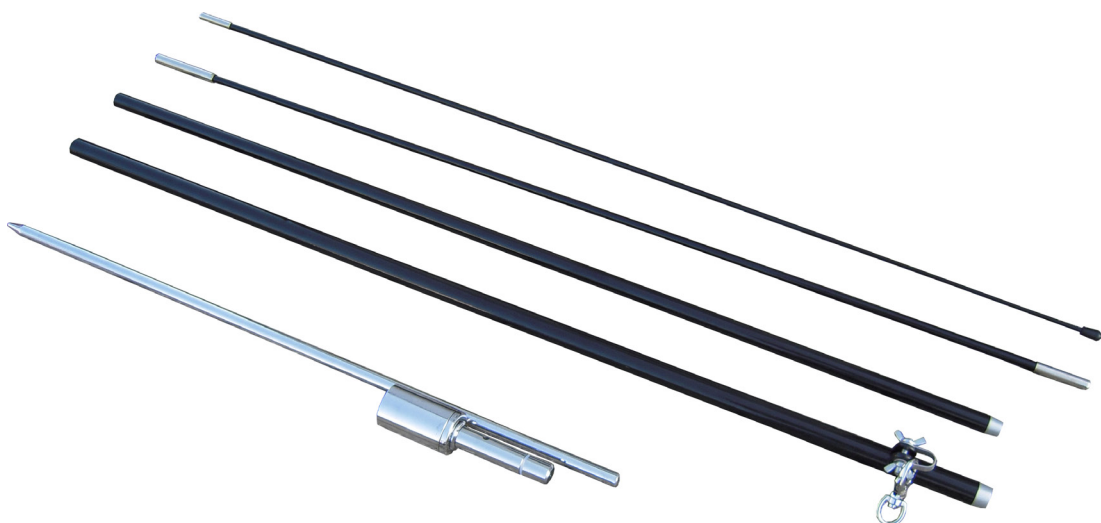

### 3.2.1 Remove the beachflag bag from the carton.

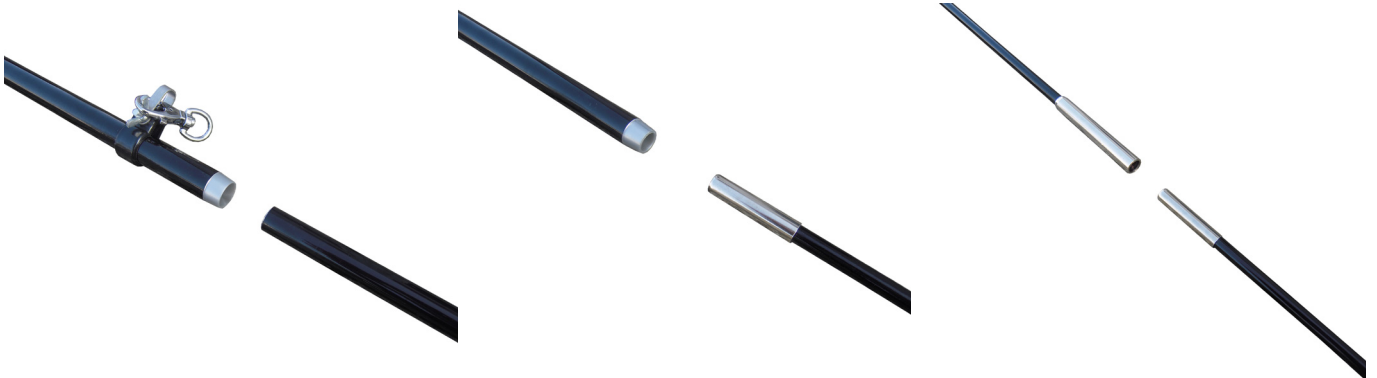

### 3.2.3 Open the Beachflag bag and take the Beachflag pole out of the bag

The Beachflag size XS, S and M comes with 4 pole parts. The Beachflag size L comes with 5 pole parts. Optional is the Ground pin.

3.2.3 Slide the pole parts in each other until all the parts are connected together.

3.2.4 Slide the flag over the smallest part of the pole.

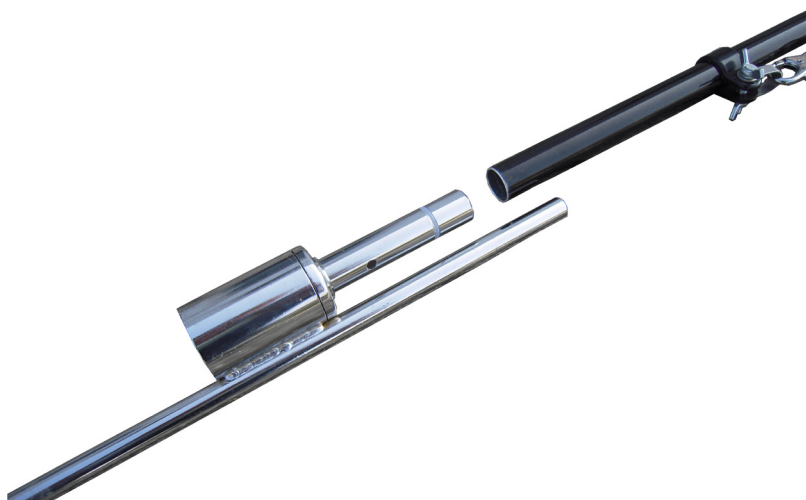

3.2.5 Use the cord or elastic to connect the flag to the hook. Use both holes of the flag as shown on the picture below.

3.2.5 Slide the clip of the pole to the bottom of the pole to tighten the flag. Do not tighten the flag to much otherwise it could damage the flag or flag pole.

3.2.7 Place the Beachflag on the ground pin or one of the other accessories

***Enjoy you Beachflag!***
