EVOline®
the e-place design

EVOline®
the e-place design

EVOline® Port

The Principle

Retractable aluminium housing with onnections for power, data and multimedia.
Easy to install.

The Function

Press the rocking cover, pull out at the opening, connect the cable, and retract it.
The rocking cover releases the path for the connected cables.

Nightlight

All versions can be lit and switched. The light corona will shine discreetly in midnight blue, ruby red, emerald green or soft white.

The Applications

In conference rooms, offices, hotels, sales rooms, kitchens: everywhere, where design and order are in demand.

Honoured with the ‚reddot award' for the highest level of design and function

reddot
design award

5

An unconventional experience.

Limited Edition
Stainless steel – Security glass – Leather

A side table in unconventional design,
becomes a service point.
Integrated, retractable connections
for power, data and multimedia as
required.

An eye catcher for hotel lounges,
reception or waiting areas.

Alternative leather as preferred.
Available with or without 60 cm glass
top.

More mobility.

Mobile application of established technology.

Rollable housing made of aluminium.
Integrated EVOline® Port with cover
silver lacquered or solid stainless steel.
Connections selectable in modules.
Power, data and multimedia.
Cables invisibly organised in
a spacious housing.

Can be opened on both sides.
Upgrades choices close to unlimited.
Efficient protection against lightning.
Efficient interference filter.
Optional LAN-switch.
Compact security and order at all
times.

For offices and conferences progress
with this solution for today's tasks.

Design follows function.

EVOline® Vertical

Outstanding design.

A free standing, stable, portable aluminium column with power, data, multimedia connections configured to suit.

Height and colour as required.
Cable store in base.
Ideal placed by event seating or tables.

Professional or private, for office or conference.

The All-Rounder.

Desks become ,e-places'.
Docking without diversions.
Approachable design.
Modules according to requirements.

Patented raised clamping feet.
Make two from one with add-on
clamps. Conduit for plug and cable.
No dust caused by electrostatics.

1. EVOline® iPhone / iPod Modules
Loading and connecting station for
iPhone or iPod.
Audio or video signals can be sent to
integrated speakers, headphones or
external playing devices.

**2. EVOline® data module
USB 2.0 active**
4 or 8 port USB hub 2.0 active
with external power pack. No more
searching for plug-in points under
the table. Comfortable connection for
multiple USB devices. Administer and
recharge several devices.
Can be combined with power, data or
other multimedia interfaces.

3. EVOline® Dock Transformer
110 Volts output from integrated
230 Volts transformer. Various
international sockets combinable.
Data and multimedia interfaces can
be added.
Can be retro-fitted at any time.
No central 110 Volt cable laying
required.

The solution for hotels and
international e-places.

Small but sharp.

Small unit for power connection.
For tables, worktops or kitchen islands.

Elegant pedestal made from
stainless steel.
Theft – secured installation for
hotel use.
Aesthetic view from any angle.
Can be retro-fitted.
Invisible cable route.

Transformation of empty spaces
with functional elements.

Horizontally at the top:
underneath cupboards and racks.
Horizontally at the bottom:
fastened to partitions and wall
surfaces.
Fitted vertically:
in corners and niches.
V-shaped profile,
For kitchens and offices and bath-
rooms,
For fastening with screws and by
snap-in.

Can be equipped with modules:
Power, data, multimedia and switches.

1. New:
FM-tuner with remote control.

EVOline® U-Dock

The innovation for economic high quality distribution.
For integrated mounting solutions or desk cable trays.

Fire resistant aluminium profile.
Any combination of modules for power, data or multimedia with safety devices, surge and near lighting protection or RCD.
Cabling through Wieland GST18 or Wago connections or in-built cabling.

Versatile mounting options.
A multi-purpose system.

Energy and Data 'Under Cover'.

Timeless design made of solid stainless steel.
International modules for electricity,
data and multimedia, able to be freely combined.

Cable outlet either as brushed finish to combat dust, or as rubber lip to repel dampness (with the FlipTop Cuisine).

Open and close with multiple latching. Data cable plugs in without kinks. Can be retrofitted at any time.

Installed flush with the work top. Special dimensions on request.

The elegant alternative for office, kitchen and hotel.

1. EVOline® meets Crestron.
For meeting room and conference.

CRESTRON.

EVOline® SubDesk

The Innovation.

For office and conference desks,
for work surfaces and furniture.

Optimised outline with rounded form. Generous cable outlets, being aligned to function.

Multi-part construction, with pre-installed cover component. Accurate simple assembly using enclosed sawing template. Cover opens 180°.

SubDesk - e-place design; effective, distinctive, unique.

The ingenious System.

Modules according to requirements. Simple to install.

EVOline® Express
Switch, protect, order at the workplace. Separate, safeguard, minimize electrical risks.
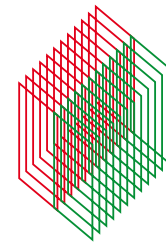

Your insurance against:
Fire – Electric shock – Lightning
Overvoltage – Short circuit
Network failure – Loss of data
High power consumption

System is safety:
Self-extinguishing plastics
Halogenfree
Contacts silver-plated
Welded leads
Protected contacts
Tested and uniquely coded
Circuit interference filter
Protection against lightning strikes
Used in hundreds of ways

EVOline® Express Data
3 power sockets VDE, 2 certified data connections, CAT 5e or CAT 6 (Reichle & De-Massari). Data cable including plug produced to customer requirements. Power connection Wieland GST18 plug connectors. Can be combined with all EVOline® Express security and switch modules. Simple elegance offering high functionality.

Cover plate:
Made of black plastic or stainless steel or plastic in RAL colours on request.

Design for the value-for-money basis fittings of your electronic workplace.

EVOline® Plug

Design meets Function.

The ultra flat design plug (Type F, SCHUKO®) creates space in front of the wall. Fits behind any cabinet. Very simple easy handling and suitable for seniors and people with restricted mobility.

The plug module „EVOline® Plug" distinguishes itself by two innovations:
- firstly by its very small construction height which makes it possible that pieces of furniture in front of a socket can be positioned almost flush with the wall and therefore can be placed more flexibly within a room - secondly by its movable plug face.

Due to this mobility although the plug is secure in the socket, very little force is necessary when pulling the plug out of the socket. This is enabled because the EVOline® Plug levers itself out of the socket.

The practical design of this plug with lengthened grip element therefore allows an easy and effortless handling especially by elderly or disabled people.
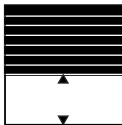

Please compare with existing situation.

EVOline® Plug – the ideal promotional vehicle.

**A quantum leap in
electrical technology.**

Switching wherever you wish –
without cables, batteries or
maintenance.

| Blinds | Power /
Standby | Air
conditioning | Light | Controlling
of functions |

**EVOline® and
EnOcean radio technology
make it possible.**

– no firmly installed switches
– no in-wall sockets
– no gaps
– no cables
– no dirt
– low installation costs
– building guided directly from
  the working place

enocean alliance

We are partner of the EnOcean Alliance
offering integrated remote solutions.

Innovative solutions for
problems familiar to everyone.

1. EVOline® Bridge
Solid aluminium.
Screw or glue fixing
on all types of flooring.
Orderly cables.
Separate power and data channels.
Dangers of tripping reduced.
Durable quality.
Resistant to UV.
Made to measure on request.

2. EVOline® CordTrack
Robust profile for cable distribution
to be fastened to the floor.
Simple access by removable cover.
Separate cable channels for power
and data.

3. EVOline® CordTrack Distributor
Distributor for CordTrack Profile.
Four directions simultaneously
or as connection for EVOline®
WireLane.

4. EVOline® WireLane
Clean cable guidance underneath
table.
Simple clipping of cables
in seperate chambers.
Flexible, rotatable.
In black or grey.
Fits EVOline® CordTrack Distributor.

5. EVOline® WireLane Connector
Securing of cables simply by screwing.
Strain relief.
Cables separated.
Technically sound.

6. EVOline® CableFlex
Bundling of cables as easy as never
before.
Various diameters.
Insertion and removal with
CableFlex tool.
