

Drive Well, Arrive Safely

## ProLine: For the safest transportation of your dog

Designed to meet the most exacting requirements, extremely robust, developed by pros for pros: ProLine dog crates are the world's first to be tested and approved by Germany's rigorous technical inspectorate, the TÜV. Their quality is especially apparent in the details. For example, in the die-cast aluminum lock housing, and in the ergonomic doorknob that you can easily open with one hand. Supplementary

bars make the ProLine crates particularly safe. A TÜV crash test has furnished the proof. When you purchase a ProLine product, you get the world's strongest, most rugged crate – and that's a fact. No other crate gives you and your dog as much quality in combination with a first-class design. They are built to match your expectations and optimally suited for transporting in your vehicle. For the rough everyday

work of security forces, foresters, animal trainers and so forth, or for animal lovers who simply want the best for their canine companions: a ProLine crate gives you top quality and makes time on the road a very satisfying experience for you and your dog.

## Only the Best for Your Dog.

Swiss engineers have designed a range of crates that optimally meet your pets' needs, in line with the philosophy behind the 4pets ProLine.

They set new standards in terms of use, workmanship, design, and safety. Professional dog keepers and experts were consulted to integrate innovative solutions in these 4pets crates.

The new generation of ProLine crates excel with contemporary design and a high degree of functionality for everyday use.

Dogs love to travel in these super-sturdy crates. Selected high-tech materials and an exclusive design make them attractive, useful, and safe products for today's dog owners.

ProLine Falcon//medium

### Easy-to-close door

The ingenious twist-lock snaps immediately and securely into place. A long lock case lends additional stability to the front of the crate. The door can be operated single-handedly to ensure you have a free hand to hold your dog securely.

### Strong connections

Fiberglass-reinforced corner connectors are firmly bolted to specially shaped bars. This makes the crate extremely stable. Due to the quality precision engineering, the crates won't rattle or make any disturbing noise while traveling by car.

### No biting or climbing

The bars on the door and the back are vertical. This makes it impossible for dogs to climb up on them or grab them with their teeth.

### Stable aluminum frame

Special 30-mm-thick aluminum bars make the crate particularly stable. The bars are also anodized to prevent rusting. All plastic connectors are fiberglass-reinforced and therefore extremely rugged.

### Dirt stays inside

The side panels protect your car from soiling. Cleaning: The aluminum is anodized, which prevents it from rusting. The special mat is easy to remove and clean with water.

### Reinforced back wall

Trough the additional safety-bar in the divided back wall, the stability is reinforced and the safety enhanced in case of a collision.

### Unhindered rear view

Vertical bars on the front and back of the crate allows the driver to see through to the rear window. To secure the crate in your car, use the supplied ratchet straps. Anti-slip strips on the bottom provide additional security.

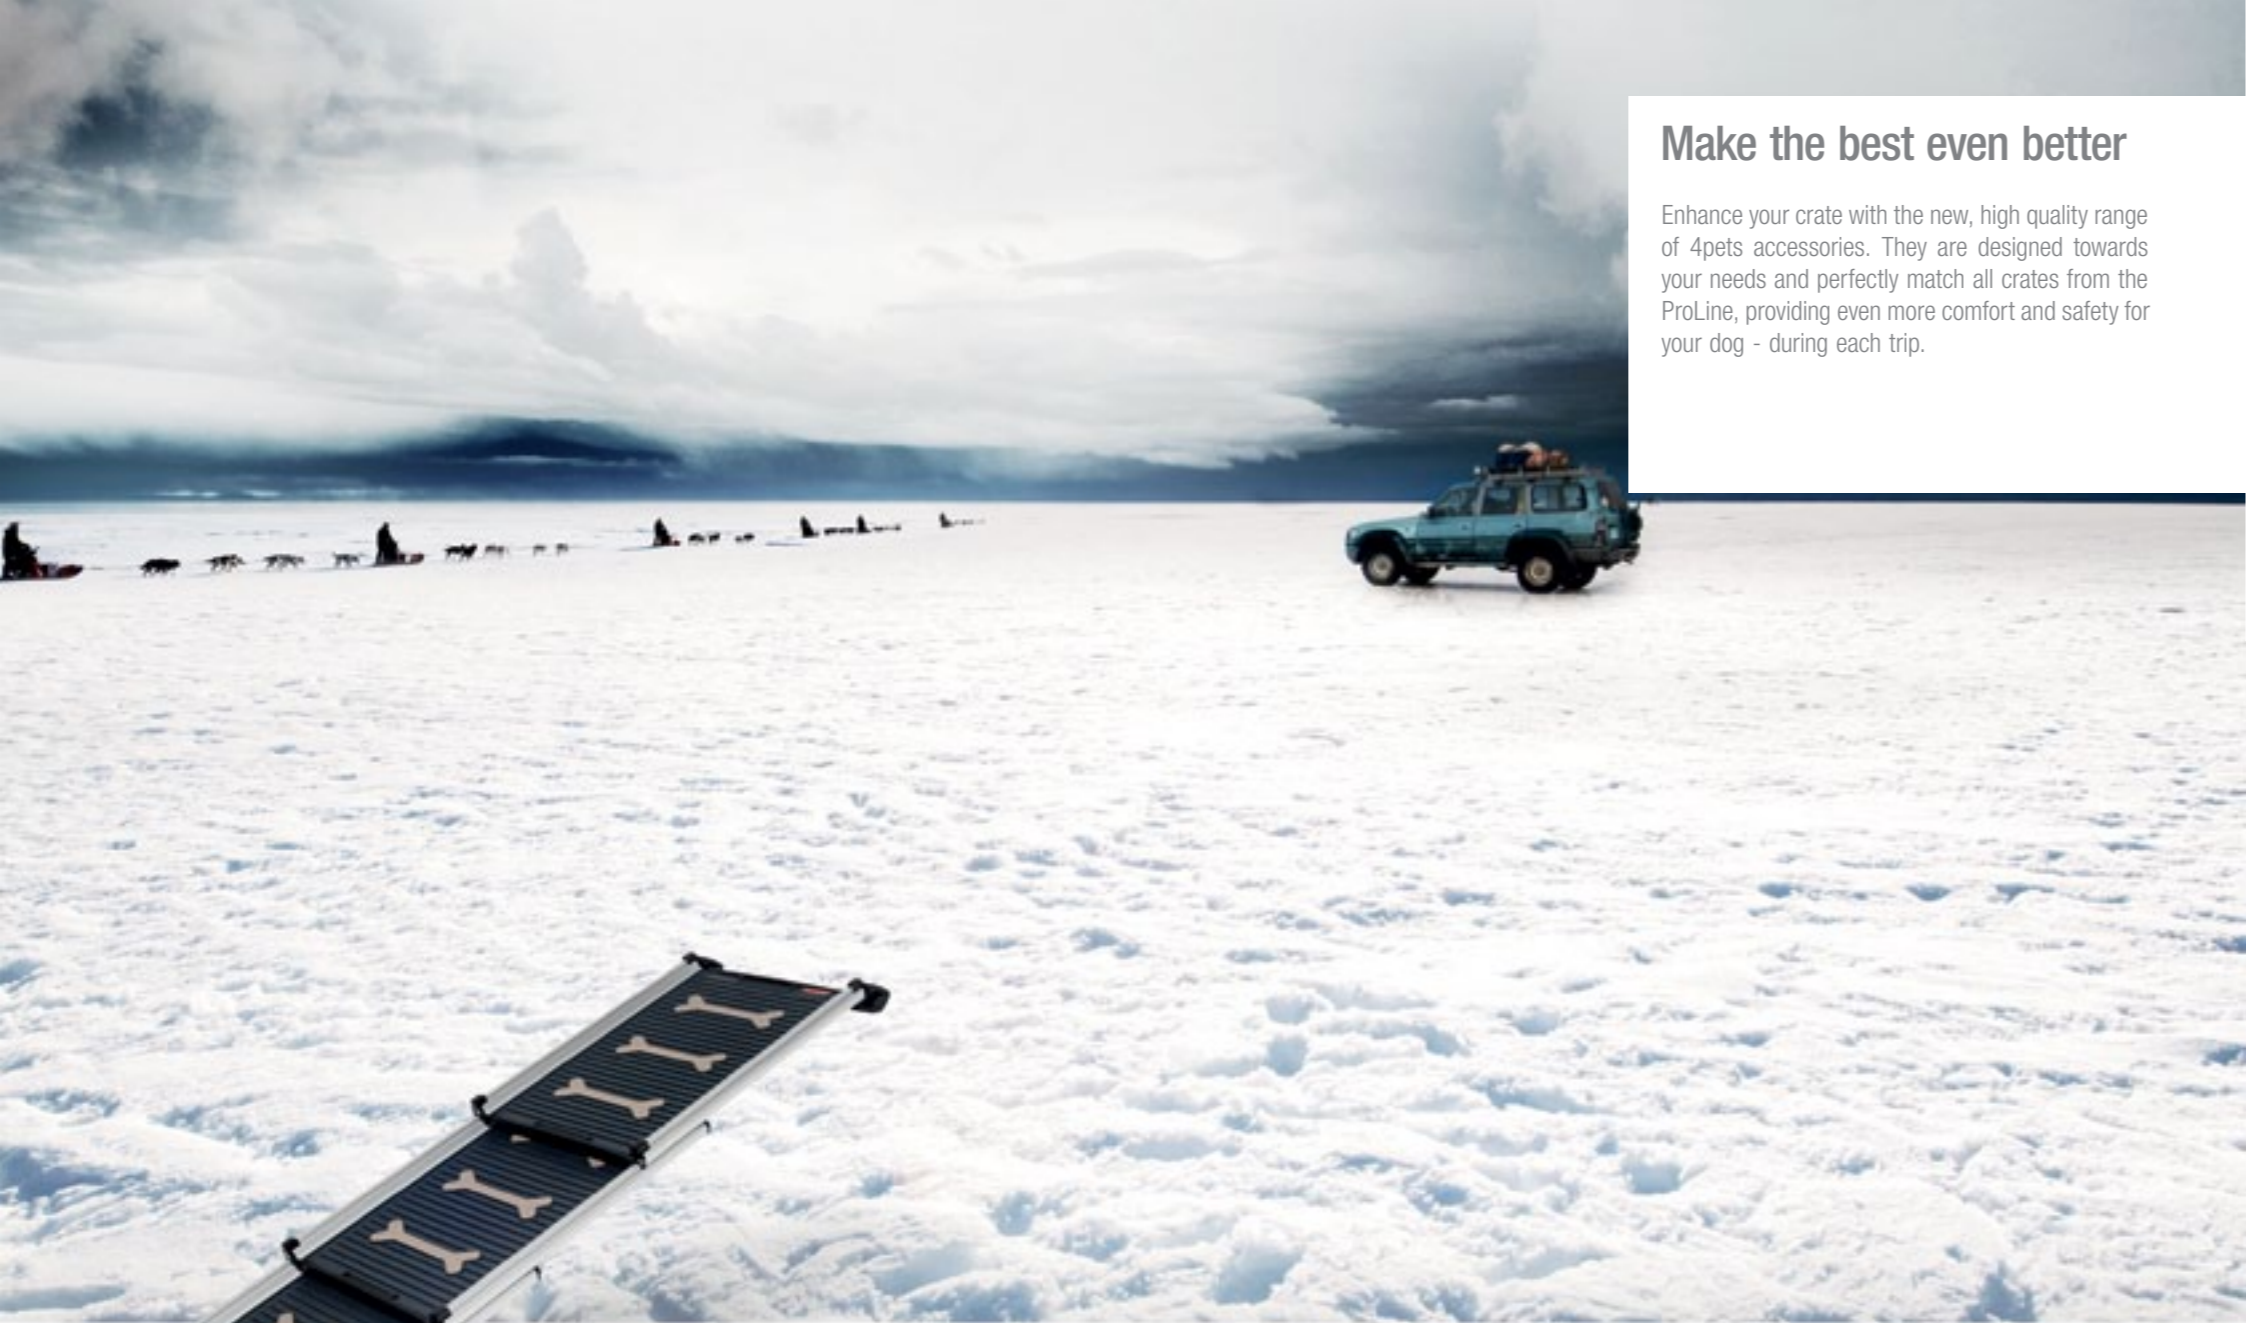

### Good air circulation

The crates ensure good air circulation – so your dog enjoys equally good air-quality as in the rest of the vehicle.

### Maintenance-free

All parts of the dog crate are maintenance-free. There isn't even any need for oiling, because the door hinges are made of a self-lubricating plastic-graphite alloy.

## Make the best even better

Enhance your crate with the new, high quality range of 4pets accessories. They are designed towards your needs and perfectly match all crates from the ProLine, providing even more comfort and safety for your dog - during each trip.

Easysteps

## STRAP-FIX

Makes every dog-box unshakeable! STRAP-FIX secures the dog crate in your car.

## CRASH-BAG

The innovative CRASH-BAG provides additional protection for your dog in case of emergency braking or in an accident. The CRASH-BAG is easily attached to the back panel of your dog crate.

## SCRATCH-GUARD

Before your dog leaps into the dog-box, simply unfold the SCRATCH-GUARD. The SCRATCH-GUARD assists your canine companion to hop into the vehicle and will protect your bumper from scratches and your car from soiling.

## Easy Steps for dogs: all aboard, please

The clever Easy Steps boarding ramp ensures that your dog always easily and effortlessly boards and leaves your car. It is the healthy, pain-free way for your dog to get in or out of the car. This compact, extremely durable and easy to use access ramp simplifies travelling with your pet.

## A Good Decision.

Your dog will feel great. And you can travel with greater peace of mind, because you know that your dog is safe and sound. The ProLine crates from 4pets excel with high stability, a contemporary design, and first-class materials. And most important: your dog is well-protected, which enhances your own safety as well. Which model is right for you and your dog?

### Globally Unique: TÜV-Tested

The world's first officially approved dog crates. With outstanding test results, for example in the crash test for large dogs up to 55 kg (121 pounds).

### Manufacture

These new dog crates are made in Switzerland using high-quality, high-tech materials and conform to strict quality guidelines (ISO 9001). There is a two-year warranty on all parts and accessories.

### Swiss Innovation

The dog crates were developed by Swiss engineers. Collaboration with professional dog keepers ensured a quality product that is well thought out from A to Z and integrates many ingenious and useful features. The crates are produced in Switzerland in an ISO 9001-certified factory in adherence to extremely rigorous quality and environmental guidelines.

### Special aspects of the manufacture of 4pets products:

#### My Social Engagement

With the "my social engagement" label, consumers and manufacturers express their shared commitment to support people who live under challenging conditions. The principle is simple: anyone who purchases a product or service bearing this label knows that they are helping to create jobs and training opportunities for people living in difficult circumstances. For more information, visit [www.mysocialengagement.ch](http://www.mysocialengagement.ch).
