the wizards of metal

Band clip sealer

The sealer is a light tool with handles which are held perpendicular to the strapping, producing a 1 up notch type seal. Because the strength of this type seal derives primarily from the shearing of the metal rather than from frictional forces, it provides a secure joint on slippery waxed strapping.

Steel band with holding case and sealing clips

FIXING TOOLS AND ACCESSORIES

HEATING ELEMENTS ARE FIXED ON THE WORKPIECE USING STEEL BAND OR MAGNETS

Band tensioner

Magnet fixer

The tensioning tool is a light duty tool using the rack and pinion method of tensioning against a specially designed "Pusherbar Seal". The tool has a strap break-off feature; by tilting the tool forward at the end of the sealing operation, the strap breaks off flush to the seal.

Product no	Product	Dimensions
1700502	Band tensioner	1,2 kg
1700504	BaL = 200 mmd clip sealer	1,0 kg
1700506	Steel band	0,5x16 mm, 20 kg/coil
1700510	Band clip	16x25 mm, 2000pcs/package
1700512	Steel band holding case	
1701006	Magnet fixer	L=200 mm, 2 magnets, Tmax 250 °C
1701010	Magnet	Ø60x15 mm, Tmax =250 °C
