

Chipfix Repair system

For the repair of scratches
and or stonechips
on all types of vehicles

Chipfix from HBC system provides

For the first time a stand-alone system and fast, low cost option for the repair of stone-chips and minor paint damage, scuffs and scratches on motor vehicles.

Combining unique new technology with specialist training Chipfix produces a deep fill, quick shine, fast dry repair and refinish within minutes.

The system allows deeper stone chip damage to be built upon to achieve the desired level of fill and make the repair optically almost undetectable.

HBC system®

Chipfix produces a deep fill,
quick shine, fast dry repair
and refinish within minutes.

Chipfix System

Manufacturers, dealers, bodyshops, car wash, mobile operators are increasingly concentrating on the provision of higher 'value added' or 'sell up' services.

HBC invests heavily in Research and Development to ensure its place as market leader and to guarantee ongoing innovation in the sector.

After intensive market and product evaluation and to compliment the comprehensive product range already in the market, HBC is now launching Chipfix Paint Repair technology systems.

Chip Fix system is a 1K system with huge benefits over existing systems available.

FEATURES

- Currently 16 1K colour range available
- Including silver tinters
- Does not contain isocyanates
- Super durable
- High build for quicker results
- High gloss levels
- Very fast drying
- Polish-able system
- High opacity
- Can be sprayed or touched in with a brush
- UV Durable
- No shrinkage
- Easy to match colours
- No fillers or primers required

Before

After

HBC system introduces a unique Chip Fix System

BENEFITS...

Fast drying

Very economical and environmentally friendly

Extensive range of colours including Silvers

Easy to use

No special equipment required

Chipfix produces a deep fill, quick shine, fast dry repair and refinish within minutes.

16 high quality Tinters in a simple kit design together with the unique Formula all supplied in an easy to use portable kit box.

Following field trials and product testing, 16 tinters are recommended as sufficient to match all vehicle manufacturers colours for fast, successful, deep fill paint chip repairs without the expense and hassle of a full paint mixing scheme.

The Formula allows the operator to wipe out the repair removing excess paint and overspray and allows them to repeat the process if necessary.

The system has been specifically developed to allow the eye-matching of colours.

This further reduces the time required to complete the repair and time is always the key element for the operator.

Practical training and the Tinter guide make this a simple, quick task. Colour variance in the repair of stone chips will be difficult to detect.

For the new operator it is important to accept that while perfection is desirable in most instances a close colour match is just as good.

A formulated ready mixed OEM colour range is also available.

Chipfix Repair system

APPLICATIONS

To repair scratches and/or stone chips on all types of vehicles.

INSTRUCTIONS

1. Clean the area to be worked on with TFR / Panel Clean/Wipe
2. Fill in the chips or scratches with the colour which is nearest to the vehicle colour. You may have to fill the chip up once or twice and let the paint dry for around 5 -10 minutes between coats.
3. Once level with the panel polish off the residue with a fine polish or you can use the special Formula to remove the excess (please note this system is polish-able unlike any other system on the market, however we can supply the special Formula if required.
4. If you use the special Formula you will have to polish the final residue with a cutting wax polish as an additional step.

System content part no. 00.1100 Chipfix system

Part no.	HBC product name	Volume
Complete range of paint tinters:
