

LINJA

LINJA SHOES – SIZE GUIDE

If you have not yet tried on a pair of LINJA shoes in one of our partner stores and would like to order a pair, this size guide will show you which size you need to purchase. Our sizes range from size 35–41,5. This size guide is especially developed for the size and fit of LINJA shoes only. Do not use this guide for other shoes.

1 Print out this size guide.

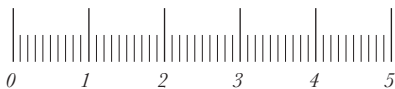

Printing instructions:

- + Save this file to your desktop before printing.
- + Printing settings should be set to:

Do not scale / Print actual size as A4.

2 To verify the sheet printed correctly:

Ensure line below measures 5cm exactly.

If this line does not measure 5 cm exactly, please check your printing settings again.

3 Place the sheet on a flat solid surface and proceed to place your barefoot onto the sheet according to the dotted foot outline. Two important points of attention:

Measure while standing and measure straight down from the **farthest point of your heel**.

Make sure the back of your heel is aligned with the back of the heel of the dotted foot outline.

For help, please use a straight object such as a book and place it directly under the solid line at the back of the heel of the dotted foot outline. Then, place your foot onto the paper so it is in direct contact with the book.

4 Now you can see where your big toe and/or longest toe meets the horizontal lines, indicating your LINJA shoe size. Please order your LINJA shoes based on your largest size measurement.

No pair of feet are exactly the same size, so be sure to measure both feet and order the size corresponding to the larger foot.

Please note: This LINJA shoes size guide was developed with great care to assist you in selecting the right size for LINJA shoes. The resulting sizes are an approximation only and therefore do not guarantee the right fit.

41	41,5
40	40,5
39	39,5
38	38,5
37	37,5
36	36,5
35	35,5
