

Technical Data Sheet

Mag 05/8 Full Hood M23FH/8

Mag 05/8
Full Hood M23FH/8

The M23FH/8 is a full hood made from a robust PVC material with clear PVC headpiece which can be used with a Magnum 8500 or compressed air.

Filtered air is supplied to the user's breathing zone via the internal air distribution system fitted into the top of the head piece of the hood and is sealed around the neck via the integral draw string to ensure the integrity of the user's breathing zone.

The hood is supplied complete with an attached air supply hose.

Specification	Weight: Assembled with hose Hose Length	1043g 830mm
Materials	Hose Hood Headpiece	PVC with plastic spiral reinforcement PVC PVC (Clear)
Standard	Approved to	EN 12941 Class TH3P EN 1835 LDH3
Storage	<p><u>Storage</u></p> <p>The headpiece must be stored in a clean dry atmosphere within the temperature range - 5 °C to + 55 °C at R.H. < 90% in its original packaging. Ideal storage conditions are 5 °C to 35 °C R.H. < 60%. Transport in original packaging. If stored in correct conditions the product has a 5 year shelf life.</p>
