

EV0line® Port

The retractable solution.

EVOLine® Port

reddot
design award

With EVOLine Port sockets and cables simply disappear. Typically just the collar and cover of the Port are visible on the work surface – with optional illumination by energy saving LEDs in blue, red, green, or white. A light pull-up motion lets the high-quality aluminum body appear from below and subsequently a push-down motion lets it disappear below the surface together even with attached plugs. The movable cover creates enough space for the cables.

EVOLine Port was awarded the „red dot design award“.
