

### AquaFinesse® Hot Tub Water Care

Please read the following instructions carefully to ensure easy, environmentally friendly spa maintenance.

#### Content of the AquaFinesse® box

- 2 bottles of 2 liter AquaFinesse® liquid
- 1 jar chlorine tablets/ \* or granules
- 1 dispenser / \* or measuring spoon
- 1 measuring cup
- 1 user manual

#### Simply weekly treatment

1. Shake the bottle AquaFinesse® before use.
2. Add the correct amount of AquaFinesse® liquid as indicated on the bottle directly to the spa water, using the measuring cup provided.  
Do not overdose.
3. Open all valves and jets. Activate pumps for one minute.
4. Put one sanitising tablet into the slow release dispenser. Place in the basket above the filter, immersed in water.  
*\* If sanitising granules are used instead of the tablet, add one level spoon (provided) to the water, after each spa use.  
When spa is not in use, add a minimum of one spoon weekly.*
5. Rinse the filter(s) weekly and clean with AquaFinesse® filter cleaning tablets.

*Spa manufacturers recommend changing spa water every 3-4 months.*

### Starting up with AquaFinesse®

Before you commence usage we strongly recommend that you deep clean your spa with the AquaFinesse® Spa Clean treatment. This will loosen biofilm and remove old slime, grime and calcium from surfaces and pipe work.

### Tips

- Purchase an additional filter to enable weekly rotation.
- Leave all jets and air valves slightly open allowing the flow of water to clean pipes.
- To save energy, always cover spa when not in use.

### A new Spa

To eliminate debris from the manufacturing and storage process, new spas should be treated with a chlorine shock and/or the AquaFinesse® Spa Clean treatment before use.

### Advice on pH

Please ask your dealer for advice on pH if you live in an area which has either extremely hard or soft water.

### Important

Use AquaFinesse® only as directed. Store in original package ensuring the child safety cap is closed tightly.

### Precautionary - First aid

Keep out of reach of children. If swallowed, drink large quantities of water immediately. Do not induce vomiting. Avoid alcohol. Seek immediate medical attention.

### Recycle packaging

Once empty dispose of packaging in the normal household recycle whenever possible.  
Thank you for choosing AquaFinesse®!

### Questions

If you have any further questions, please contact your AquaFinesse® dealer or consult the website for FAQ's: [www.aquafinesse.com](http://www.aquafinesse.com)
