RACE COMBO

WHEN YOU'VE SEEN
THE SPEED OF LIGHT

A hundredth of a second isn't the difference between first and second, it's the difference between winning and nothing at all. If you race, you understand.

A centimeter is the grandest of canyons, and there's no such thing as fast enough. But thanks to our athletes and their insatiable demand for more speed, better speed, and faster speed, we're all going a lot quicker.

This is trickle-down technology at its finest. Though anything that is so fast could hardly be called a trickle.

WHEN YOU'VE SEEN
THE SPEED OF LIGHT
WHEN YOU LIVE ON THE EDGE
WHEN ADRENALIN
IS YOUR ONLY FUEL
WHEN YOU ARE THE ONLY
OPPONENT TO BEAT

WHAT'S YOUR LIMIT?

BEHIND THE SCENES

it's easy to look at a ski or a boot and forget about the work that went into it.

That's the problem with brilliant engineering: it only makes itself apparent when the ski disappears beneath you. It's the problem with incredible design: a boot can be so sublimely comfortable that you can totally focus on other things - like the finish line. And it's the burden of every athlete - the faster they go, the easier they make it look.

At HEAD, we're inspired by those who push themselves, drive the sport, and create solutions. And if you ever get to visit our headquarters, you may find that we're inspired pretty much all the time - because we're surrounded by those people every day.

So we'd like to take a moment to say thanks to every staff member and all our athletes. Together, you're pushing the industry forward, and inspiring more and more people to put on skis and discover this beautiful sport. And every time we ask you 'What's your limit?' The answer only opens another question,

What limit?.

WORLD CUP REBELS i.GS RD M / W

No speed can stop this ski from turning.
World Cup proven.
