IT'S PARTY TIME

At Zuiver it's always one big party! Throughout the year we celebrate the launch of new products. As soon as a new product meets our Zuiver DNA requirements, we roll out the red carpet to the photo studio and present the new Zuiver items to the general public.

My wish to extend Zuiver's collection to include home accessories this year has become reality! It was a real 'wow' moment when the samples recently arrived. Turn to the Home Deco section on page 142 to discover our new beauties.

In May this year we could hardly believe our luck. After having won the "Zaanse ondernemersprijs" (regional enterprise award) in 2015, we're delighted to have scooped up another award in 2016. This time we were awarded as the best enterprise of the province North Holland!

Another happy moment with a lot of champagne was when our new chair rolled off the production line. It had been our long-time wish to design and launch a moulded chair and now.... TA-DA! With great pride we present to you the Zuiver Albert Kuip chair! Together with design studio APE we worked and worked on this chair until it was worthy of the Zuiver stamp. In fact, we're so proud of this chair that we left the stamp on the bottom! Read the story of Albert Kuip on page 4-5.

As you'd expect, we also added lots of Zuiver items to our other product categories. Flick through the catalogue at your leisure and spot the new items by the 'NEW' stamp.

Having your own Zuiver party? Don't forget to tag us in your photos using #zuiver

“I love powdery colours like taupe, soft grey and faded pink. They look stunning combined with marble, but also with olive green, plants, copper... The possibilities are endless with our Zuiver items.”

THE STORY OF ALBERT KUIP

“Design a moulded chair that perfectly fits our Zuiver DNA”. That was our brief for design studio APE. Not the easiest of assignments, but they’ve pulled it off. After 18 months of designing, 3D printing and refining and developing their design, we can now finally present to you our pride and joy: the Albert Kuip chair!

APE is an Amsterdam-based design studio consisting of Gert, Tom, Lennert and Douwe. “When Zuiver approached us with this assignment, we were full of ideas from the word go. Our chief starting point was a distinctive chair that is first and foremost really comfortable”, Lennert says.

It wasn’t long before APE showed us their first design. Douwe: “For all our designs we always create an in-house 3D printed scale model. The first rough design we presented hit the right note. Once the final design was agreed upon, we created full-size prototypes to allow us to optimise the chair.

The name of the Albert Kuip chair is a humorous nod to the famous Albert Cuyp outdoor market in Amsterdam. “It’s all about word play of course, because in Dutch, ‘Cuyp’ is pronounced the same as ‘kuip’, which is another term for a moulded seat. Then there’s the fact that our studio is located in Amsterdam, so it’s also an indirect reference to us”, Gert explains.

APE: “What we’re most proud of is the actual comfort of the chair”

What the men are most proud of is the seating comfort of the chair. Douwe: “You can use it for active sitting, but you can also just chill out on it. Not an easy combination to achieve in a chair. It’s the slightly flexible back rest that makes this possible. As we see it, Albert Kuip is the ultimate combination of comfort, design appeal and quality.”

Because of its robustness, this moulded chair is well suited for commercial projects. Tom: “The aluminium connecting piece ensures a strong connection between the moulded seat and base frame, while at the same time giving the chair an airy appearance. Even so, we designed Albert Kuip as a dining room chair; that’s why the armrests will fit under virtually any table.

APE: “As we see it, Albert Kuip is the ultimate combination of comfort, design appeal and quality.”

In the meantime, the APE men are busy creating a follow up to the Albert Kuip chair. “There’s a perfect match between us and Zuiver. Doing this project has given us lots of new ideas. We can’t say much about it at this stage”, Tom continues, “but there will be another collaborative project with Zuiver”.

ALBERT KUIP CHAIR

NEW

Zuiver Albert Kuip is a special one, we knew it from the very first moment. We designed this baby together with Dutch design studio APE. But Albert Kuip is not just eye candy, it's also most comfortable!

Chair Albert Kuip is a moulded chair, available with and without armrests. We thought that besides natural colours like grey and white, you would also appreciate the seat in trendy powdery colours like taupe and old pink.

Did we already mention the flawless sturdy transition from seat to legs? Oh yeah, Albert Kuip is sturdy and steady! The elegant legs are made of solid ash wood. Very classy if you ask us!

Working and relaxing, that's what Albert Kuip is made for. Use Albert Kuip as a dining chair or desk chair, it's up to you!

LOUIX

Design: Alexandre Arazola

Designer Alexandre Arazola on the concept of his patented design: "The mix of two French designs classics, the XVIIIth century wood medallion LOUIS XVI chair and the industrial, galvanized sheet chair of the 1930s. A well-balanced mix of curved and straight lines, and a perfect marriage of the materials to provide the best comfort on a solid chair."

Chair Louix is clearly inspired by an industrial classic, but our translation comes with a twist. Alexander made it a real Zuiver with the comfy wooden seating, detailing, colours and comfort. Chair Louix comes in two colours. You see, we like to give you a choice...

A multifunctional side table! That's what we shouted when Zuiver TIGA was born. It's a set of two small tables. Small, but still rough and tough! TIGA is made out of cast aluminium. A powder coating in matt black and cool grey gives the grained surface an industrial touch.

These two little rascals love to be together, but you can also separate them. Don't worry, you don't have to feel bad about this. They also stand alone well! So, do you already know for what purpose you'd like to use Zuiver's TIGA?

Feel free to compose your own Cupid family!

CUPID

So, we actually had meetings about Cupid. For we couldn't decide what colour this light weight, yet sturdy, side table had to come in. Copper, silver, gold or black. We even asked our Facebook fans. In the end we decided not to decide at all. We think all our Cupids earn existence.

Copper/silver/gold:

OAK TRAY

Oak Tray is a table with benefits. Not only does the high border keep things from being knocked over, the tabletop also doubles as a tray. Imagine: All those empty glasses and bowls with crumbs can be brought to the kitchen in just one go! But to us that's only one of the reasons to buy it. We just love the look of it! Especially since it comes in two sizes, a higher side table and a full size coffee table, which of course combine beautifully!

TREETOP

Neatly sawn boards of Teak? Boring! Treetop is constructed out of a slab of the teak tree. So no two are alike. We gave this side table metal legs. And then we just stopped meddling with it. Because it was just perfect.

So stylish and hip anyone could find a spot at home for Antique Copper. This lovely convex side table can always be right there: at your side. It is of course perfect for an interior with a 'Marrakech theme'. But we believe this side table would feel at ease in any home, no matter what the theme is.

LAZY SACK + HOCKER NEW

Who are you calling fat? We call our Lazy Sack fat. And he is proud of it! Look at that oversized cushioning, those round forms and sink-in-ready comfort. Who wouldn't want to subside into all that luxurious soft material? Check out those baseball bat legs, you just know he is sturdy enough to just dive into. And: there is a footstool too!

You should never judge anything by its size. Same with hocker Lazy Sack. Of course he sort of belongs to the much bigger lounge chair Lazy Sack, but we feel that hocker Lazy Sack has so much going for him that he could also be a standalone! He can be combined with your existing sofa or lazy chair or be a quick seater by himself...

MOOSE

Carpet Moose is a special carpet. Not only because of the patterns, inspired by the famous Norwegian sweater. No, there are more reasons. Tell us, how many carpets have a brother from-an-other-mother? He is called Pillow Moose. Yup, we did it. We just had to use this comfy wool-cotton mix with its pretty woven pattern in more than one design. Besides, think how well styled your house will look when your throw pillow and carpet match? SALMON

We at Zuiver have a soft spot for Scandinavian patterns. Patterns like the ones on the famous Norwegian sweaters. We have finally found a way to incorporate them into our interiors: with Carpet Salmon. A nice wool-cotton mix, Soft to the touch and warm to the feet. Such a pretty woven fabric, we just had to use it in a runner and a pillow. Of course they can be bought separately, but imagine how well-balanced your interior will be when your rug and pillow match....!

GRAPHIC

There is something about graphic patterns. Wisely used they can be the most subtle home decoration. Unwisely used they can add psychedelic assets to your interior. So, basically, you can never go wrong. Especially not with our easy going Carpet Graphic. We embellished it with a black fringe for that extra oomph factor. Looking at the result we just couldn't stop. We wanted more. Therefore, we added a matching pillow. Pillow Graphic for the ultimate finishing touch. Needless to say they match perfectly and are made out of 100 percent cotton.

NORWAY

Picture yourself in a Norwegian winter. In front of the fireplace. Curled up on a comfortable warm, and yes, fantastic looking, hand-knotted carpet. It must be our Norway. But don't let us, or its name fool you, Norway can be used legally outside Scandinavia as well! And because we feel a carpet like this can hardly ever be too big, we also make it in a respectable XL size.

Warm metal finishes, like copper and brass are hot! So is our Metal Bow. So it made sense to us to bring them together. Hence the Metal Bow Copper and introducing (drumroll...) Metal Bow Brass. Obviously we are very excited about the outcome. Actually, we don't think we need to even explain why. Just look at them! Wow.....

TORCH

The force of uplighters is often underestimated in the world of light fixtures. Let us reveal an interior decorating trick to you: Uplighters brighten up the part of the room that usually doesn't get the spotlight: The ceiling. This gives an immediate feel of space to even the smallest room. And in an ultra hip copper-look, like Torch here, this uplighter will become your super hero.

ARC

There is definitely something aerodynamic about Arc with its asymmetric shade. This super tall, yet elegant, floor lamp is an eye catcher in even the wildest interiors. She can light your coffee table from above, without dangling from the ceiling. Which would be lame and would require wiring exactly above your table. And you know those wires are seldom where you need them to be!

CONCRETE UP

We believe every interior deserves a good uplighter. A light fixture like that has multiple advantages. It'll cast an interesting light bundle on your walls and creates an airy feel in your room, by lighting up the usually darker ceiling. Convinced? Uplight your interior with our Concrete Up. Cast in, yes you guessed it, concrete. For an industrial, modern feel.

We are pretty psyched about our LED-it-be lamp, which comes in a floor, table and wall version. It's a hyper modern LED lamp pretending to be an old fashioned lamp. We have noticed designers all over the world are playing with silhouettes and bringing their designs down to just simple outlines. "LED-it be "is our version of that trend. And boy, do we like it!

TRIPOD COPPER

Who invented the tripod base for the shaded lamp? Give the man a medal. We love it! But you probably noticed that, because we have designed a series of very elegant tripod floor lamps. And with this newest addition, Tripod Copper, we think we have earned a medal too. We combined the tripod with trendy copper. How brilliant is that? Combine Tripod Copper with a black or a white shade and just let it shine...

Desk lamp Broker has an impersonator. It's true!
 Desk lamp Broker Concrete impersonates desk lamp Broker Black. Or the other way around. We're not sure to be honest. All we know is, that both have the right to exist. See, the concrete version has a shade made from actual concrete. And it is the un-sanded powder coated finish and chic copper coloured inside of the shade that makes Broker Black stand out.
 So it's up to you to pick a favourite. We couldn't.....

TIKTAK TIME

In clock Tiktak Time we tried to combine modern and classical details. The oldest reference is in its metal pendulum, which comes in copper, brass or black. For the face of the clock we were inspired by designs from the fifties. And of course the lightweight concrete is totally inspired by the latest trends. That makes Tiktak Time possibly the most time telling clock ever...

CONCRETE TIME

So imagine this: a sweaty, warm, late afternoon in Guangzhou, China. We were visiting one of our suppliers. A clock specialist. During our visit, whilst talking, one of our designers suddenly got struck by clock-geniusosity. "Light weight concrete with 3D numbers!" was his vision. The clockmaker added coloured aluminium hands for the finishing touch and we named the result Concrete Time. Also cool right?

PINNACLE

Our inspiration can come from anything. Sometimes even from the weirdest things. For this coat rack it was the ancient game of Mikado. We gave this Asian agility game a Scandinavian feel by using blond wood and a white or dark grey detail. Naturally we had to scale everything up a bit. The result is this free-standing coat rack. We called it Pinnacle.

Or tie... Depending on your sex... O, well, you get the picture, right?

SARONA

NEW

For pillow Sarona we were inspired by the old weave technique of velvet jacquard. In the weaving process we let threads in contrasting colours appear and disappear in a random looking pattern. The result is a fabric with a nice distressed look. As if it was sanded, but that would have made the pillow hard and rough, while Sarona is über soft. We liked the result so much we used it in several colour combinations and made all of them into a nice throw pillow.

MOOSE

Pillow Moose is a special pillow. Not only because of the patterns, inspired by the famous Norwegian sweater. No, there are more reasons. Tell us, how many pillows have a brother from-an-other-mother? He is called Carpet Moose. Yup, we did it. We just had to use this comfy wool-cotton mix with its pretty woven pattern in more than one design. Besides, think how well styled your house will look when your throw pillow and carpet match? Smashing!

SALMON

We at Zuiver have an absolute soft spot for Scandinavian patterns. Patterns like the ones on the famous Norwegian sweaters. We have finally found a way to incorporate them into our interiors: With Pillow Salmon. A nice wool-cotton mix, soft to the touch and warm to the feet. Such a pretty woven fabric, we just had to use it in a pillow and a carpet. Of course they can be bought separately, but imagine how well-balanced your interior will be when your rug and pillow match.....!
