

Tester which allows not only the control of the charge status of a battery (6/12V), but also verifies the correct functioning of the starting system (12V), the starting capacity of the battery - CCA - (6/12V) and the charging system (alternator) of the vehicle's battery (12V). Handy and easy-to-use, it enables to operate with batteries (WET, GEL, AGM, PbCa) at 12V without disconnecting them from the vehicle, making the testing operations easy and quick to perform.

| 6/12V COMPACT TESTER | BATTERY STATUS AND VOLTAGE TEST | BATTERY START POWER TEST (CCA) | START SYSTEM TEST | CHARGE SYSTEM (ALTERNATOR) TEST |
