

# PULATTE

Pulatte is formulated to clean automatic coffee machine milk lines and frothers. Regular use of Pulatte will not only clean and sanitize the milk system but also remove milk-stone from the lines and system components.

## FEATURES & BENEFITS

- Rapid dissolution
- Advanced formulation
- Removes milk stone, cleans and descales milk lines and automatic frothers
- Medium foam level
- Excellent cleaning ability
- Accurate dosing with 5g dosing scoop
- Free rinsing formulae – no foam means product is rinsed out

## INSTRUCTIONS

*To clean milk lines and frothers:*

- Add 10g (2 scoops) to 500ml (2 cups) warm water in a container or jug.
- Stir until powder is completely dissolved.
- Flush milk out of system.
- Flush the entire solution through the milk system following the machine manufacturer's cleaning instructions.
- Once the solution is dispensed, rinse the container. Fill the container with 1 litre (4 cups) of clean water and flush through the milk system to thoroughly rinse.

*To clean milk system machine parts:*

- Add 10g (2 scoops) per litre of warm water in a container.
- Stir until powder is completely dissolved.
- Add parts to be cleaned and allow to soak for 30 minutes.
- Rinse thoroughly in clean water and dry with paper towel or clean cloth.

Always refer to the machine manufacturer's instructions for the correct method to flush the cleaning solution and rinse water through the milk system.
