150-MM885 SOTT Distance Bracket

150-MM884 SOTT Heat gun Holder

**SOTT**  
**Heat gun Holder**  
**150-MM884**

*Special holder for your hot air gun - always at the ready*

**Looking to work faster and more efficiently? You can!**

Simply use the special attachments for the big SOTT mounting magnet 150-MM883. One is the 150-MM884 Heat gun Holder. This metal bar is inserted into the holes of the magnet handles, one on each side and presto! You have a real holder for your heat gun. Because the body is metal there won't be problems with the hot nozzle of the gun, which is perfectly protected in the round tube. From now on, no more trouble with laying down your hot air gun or finding it again.

*\*Note: only works with two SOTT Goliath magnets*

*The heat gun holder is set apart of the vehicle body, so it cannot be damaged.*

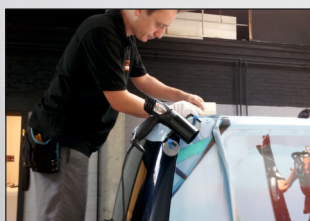

*Simple place the heat gun holder into the holes of the magnet handles and it is ready for use.*

*Your heat gun can easily be put in and taken out of its holder without sticking.*

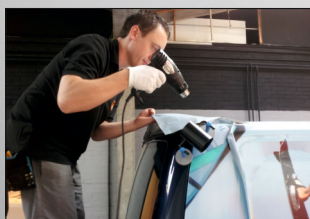

*The metal construction of the holder protects the car body against the heat of your heat gun.*

## NO MORE REACHING TOWARDS THE FLOOR

All film installers know this: desperately groping behind you on the (dirty and dusty) floor to find a hot air gun you left there before. Which might still be hot! Thanks to the hot air gun holder this is a thing of the past. Just stick the holder anywhere on the car body and you'll always have the hot air gun handy and off the floor.

## IDEAL FOR INSTALLING IN HIGH PLACES

Always difficult: installing film and using a hot air gun on a roof or high on the side of a vehicle. Where to put the hot air gun?

No more bending, picking up, heating the film, carefully putting away, applying the film, etc.

That is over! From now on you won't have this problem any more. Just place the holder and you can apply, heat up, stretch, apply, heat up, stretch, etc. much faster.

### Product information:

*The SOTT Heat gun Holder is made of durable black passivated metal so it's corrosion-protected. Available by the piece.*

**150-MM884 SOTT Heat gun Holder**

### Important:

*The Heat gun holder requires two SOTT The Goliath magnets type 150-MM883. Available by the piece.*

150-MM885  
SOTT Distance Bracket

## Tool bar - your 3rd hand during installation

**SOTT**  
Distance Bracket  
150-MM885

Materials and tools often clutter up the space around the vehicle during installation. What could be nicer than a handy bracket to hang your cloths and spray bottles?

Installers often find they just haven't got enough hands for everything. A third hand would be so welcome. We have the solution for both problems.

*\*Note: only works with two SOTT Goliath magnets*

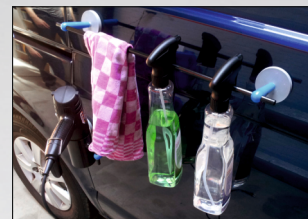

The SOTT Distance Bracket simply fits into the holes in the handles of The Goliath mounting magnets.

The SOTT Goliath magnets have a combined pull of more than 50 kg(!), thus making the SOTT dispenser ideal and safe for various applications.

With a length of 2 feet it is the ideal bar to stretch the vinyl before you start wrapping, say, a mirror.\*

Hang your cloths, spray bottles, etc. on the SOTT Distance Bracket and your tools will stay clean and be at your fingertips.

## CLEAN AND ORGANIZED WORK

Workshops usually look like this: rags and degreaser spray bottles everywhere and installers running around cars looking for them. Simply use the SOTT Distance Bracket to keep all the articles off the floor, so that everything stays clean - plus you have everything within reach.

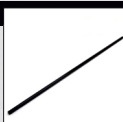

## \*YOUR 3RD HAND WHILST PRE-STRETCHING

The newest method to wrap small round shapes such as a door handles, antenna bases or mirrors, is to pre-stretch the film to stretch and then, during the installation, to heat-shrink it again. The SOTT Distance Bracket is your perfect assistant! Attach the film to the bar and you can heat and stretch it as much you like.

### Product information:

The SOTT Distance Bracket is made of durable black passivated metal so it's corrosion-protected. 53cm long.  
Available by the piece.

150-MM885 SOTT Distance Bracket

### Important:
