

Simply Heat Up Corners and Fixate them together

The CornerSealer

Are there tools that can simplify film installation? Yes, definitely! SOTT introduces a selection of handy tools that no installer should go without.

Have you ever had small creases pop up at the corners of a wrap? Or small overlaps that lose their adhesion?

This practical tool is intended for releasing the tension off installed film edges around corners. The **CornerSealer** allows you to melt small creases or curly film edges and close or flatten them.

INSTALLATION

Perfect for:

- **fixating the edges of wrapped film around corners**
- **melting together small film overlaps**

Within seconds, the flat head gets hot enough to melt the film.

Simply push the hot flat head against the crease or overlap and 'melt' the film(s) together and/or in place.

This effectively fixes the edge of the film until it is tension-free in its new shape.

The flat head allows you to melt small creases or curly film edges and close or flatten them.

HOW TO USE:

- *Make sure film is clean and degreased*
- *Activate the device to preheat the flat head. This takes about 10-15 seconds (preheating time increases with deteriorating batteries). ATTENTION! Head can get hot!*
- *Avoid skin contact to prevent injury*
- *Place the flat head against the film area and push down firmly*
- *Avoid overheating! 1-3 seconds of pressing is usually sufficient*

ADDITIONAL INFORMATION

- *The enormous heat produced by the CornerSealer drains batteries fast - make sure you carry sufficient replacement batteries*
- *First test the device on a small area out of sight, to assess its effect*
- *The heat resistance of films varies. Keep this in mind to prevent damaging the film by overheating*
- *In any case avoid contact with the head when still hot after use*
- *Do not use the CornerSealer for other applications than intended*
- *Do not use the CornerSealer longer than 5 minutes in one session*
- *Use alkaline batteries (not rechargeable)*

ABS housing

Pocket-size

Works on 2 alkaline batteries

(not included)

The CornerSealer
Part No. 400-SC01
