

COPILOT & STEEL COPILOT

Elegant. Simple. Tasteful.

COPILOT can be described as a series of simplistic and tastefully designed chairs – ready to meet the demands of everyday modern life.

The COPILOT-series is developed and crafted with undeniable inspiration from classic Danish furniture traditions, and the result is archetypical Scandinavian design aesthetics with all legs firmly planted on the ground.

The overall simplicity of the PILOT design allows subtle handcrafted details to emerge – articulating and underlining the design vision. Furthermore, the chairs are characterized by the seamless combination of soft shapes and sharp edges – elegantly merging masculine and feminine characteristics.

With the introduction of steel base chairs, the beautiful new STITCH fabric and two additional STEEL COPILOT barstool sizes, the range of PILOT CHAIRS is more than ever a great choice for any design lover that wishes to navigate safely through today's design jungle.

“True aesthetics...”

dk3 is a furniture design concept that emphasizes natural aesthetics.

We create uniquely designed furniture that is shaped and crafted by true enthusiasts. Always with a focus on personality, pride and sustainability. It is a vision of uniting the finest carpentry traditions with modern and classical furniture design through the fusion of timeless steel or brass components and high quality wood.

The love of the organic material and uncompromising focus on quality is evident throughout the process, from the first design sketches to working in the carpentries, where the furniture is finished and surface treated by hand.
