

## Technische Specificaties

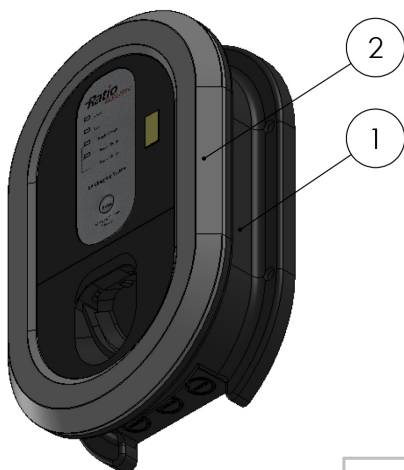

### EV Wandler

**Art.nr. 35351**

|                           |                                                       |
|---------------------------|-------------------------------------------------------|
| Laadstandaard             | IEC 61851-1, Mode 3                                   |
| Ingang spanning           | 3-Phase 230V / 50 Hz                                  |
| Max. ingang stroom        | 32A                                                   |
| Max. uitgang vermogen     | 22,2kW, instelbaar 10A, 16A en 32A                    |
| Aansluit systeem          | Vaste laadkabel 5 meter, type 2 connector aangespoten |
| Omgevingstemperatuur      | -25C° tot +50C°                                       |
| Luchtvochtigheid          | Max. 95%                                              |
| Beschermingsgraad         | IP54                                                  |
| Electrische beveiligingen | Extern                                                |
| Behuizing                 | PC/ABS, kleur zwart                                   |
| Afdek ring                | ABS, verchroomd                                       |
| Statusinformatie          | 3 LED's                                               |
| Autorisatie               | Auto start                                            |
| Afmetingen (LxBxH)        | 401x251x109,5 mm                                      |
| Gewicht                   | 6,1kg                                                 |
| Markering                 | CE                                                    |
| Montage                   | Wandmontage                                           |
| KwH meter, MID            | Nee                                                   |
| Opties                    | RVS enkele of dubbele paal<br>Sleutel schakelaar      |
