

1 4 Crutches Days

Made from lightweight anodised aluminium this range of crutches all feature an angled neck to reduce strain on the users wrist. All are height adjustable; either single or double adjustable. The plastic hand grip can be wiped clean and all feature non marking slip-resistant ferrules for added safety. The closed fixed armband enables the user to retain the crutch on their arm even if they release the handle. **See table below for ordering information and technical specifications.**

5 Comfy Crutches Days

These crutches are made with a softer more comfortable handle. The crutches are made from lightweight anodised aluminium, adjustable height in both single and double adjustable versions.
