MAX PRO HEAT PROTECTION GLOVE

While curling the hair with one of the Max Pro curling irons [Twist: 18 / 9mm, 19mm, 25mm and 32mm - Miracle 5in1: 18 / 9mm, 19mm, 25mm, 25 / 19mm & 32 / 25mm] it is strongly advised to use the included heat resistant glove. The Max Pro curling irons do not contain a valve due to the protection of the hair. Max Pro has specially designed this heat resistant glove to prevent burns. The glove is made of heat-resistant material and offers protection up to a temperature of 200 degrees. This allows you to easily hold the bar of the curling iron and this makes it perfect to use in combination with one of the Max Pro curling irons. The glove can be worn on both the left and the right hand and is one size; fits all! This allows the hair to be easily styled without burning the hands.

Attention: Only to be used in combination with hair styling tools. Max Pro is not liable for improper use of the products.

GOODBYE TO BAD HAIR DAYS
