BLACK, YET TRANSLUCENT

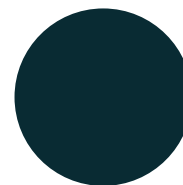

A truly unique vinyl film, DYNACAL Black and White Film looks black when undisturbed, yet appears as white when backlit. This effect is achieved by the film's translucent properties.

FLAT SURFACE WITH NO HOLES

DYNACAL film's surface is flat. The absence of holes gives it a clean and professional look.

COMPETITOR'S

DYNACAL™

Conversely, the competitor's product contains holes in its surface. In addition to their tendency to accumulate dust, they are unsightly when viewed up close.
