It's terrific what a difference a good night's sleep can make.

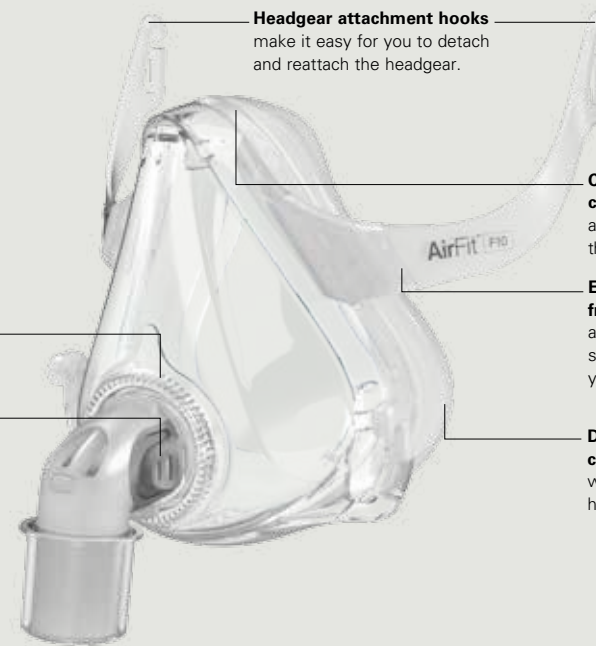

AirFit™ F10
Full face mask

ResMed recognises that full face mask patients want a mask that is comfortable to wear, quiet, and simple to use.

That's why we created AirFit™ F10 – a compact full face mask offering you superior comfort, proven performance, and ease-of-use.

SoftEdge™ headgear is made from premium rolled-edge fabric for reduced facial marking.

Circular diffused venting disperses air gently and quietly away from you and your partner.

Quick-release elbow has handy side buttons for fast detachment.

Headgear attachment hooks make it easy for you to detach and reattach the headgear.

Cushion-to-frame connection makes attaching the cushion to the robust frame easy.

Enhanced Spring frame is lightweight and designed for stability, while offering you unrestricted vision.

Dual-wall Spring Air cushion provides you with a comfortable high-performance seal.

The AirFit F10 **for Her** is designed especially for women, offering a smaller size for female facial contours, along with stylish tones and highlights.

Optional soft sleeves

Set up with ease

We believe that your mask should fit seamlessly into your everyday routine. That's why AirFit F10 was designed with a focus on simplicity and ease-of-use.

With only four parts it's simple to put on and remove each night and very convenient to clean. Its lightweight frame offers a clear line of sight so you can read, watch TV, or even wear glasses while wearing the mask, enjoying uninterrupted vision as your therapy ramps up.

Get comfortable for sleep

The mask's SoftEdge headgear rests gently on your face and is easy to put on and take off.

The dual-wall Spring Air™ cushion provides a secure seal. It's light, flexible and designed to gently inflate against your face, to maintain a seal, even as you move during the night. And when you're asleep, the circular diffused venting directs air away from you and your partner so both of you can enjoy a peaceful night's sleep.

Feel refreshed when you wake

When you wake up the next morning feeling rested, you're more likely to feel energetic – ready to enjoy the day ahead.

AirFit F10 is the right fit for you
