Terra Cotta – Indoor

Atlantis

The ribbled surface of the Atlantis pots is made by imprinting metal plates.

The ceramic is glazed and baked on a specific temperature in a ceramic oven, different from the terracotta-oven.

Because of the special shape of these pots, they are not frost proof.

Raku Pottery

Raku is a baking technique originated in Japan, in the mid-sixteenth century. During the extreme temperature change of cooling down, crazing or cracking occurs on many of the glazed areas of the pots. The multitude of parameters involved provides results varying at infinity, which gives each piece the quality of a single object.

Terra Cotta Outdoor

Hand thrown

These are turned by hand. This makes every pot a unique piece.

Rotated inside a mall

In a rotating movement the clay is pushed by a knife into the mall. This special technique is used for the smaller models.

Clubbed into a mall

Here the clay is hit into the mall by hand. This technique is more suitable for bigger pot.

Frost proof

Suitable for outside, winter resistant

Waterproof

These are 100% Waterproof and Can be used As flower vases.

Atlantis Natural

Our own high quality clay has a kaolin basis with special properties. While baking the clay will coalesce so that virtually no absorption of water is possible. Our terra cotta pottery absorbs no more than 3-4% of water. With this low percentage of water our potteries are guaranteed frost proof.

Terra Cotta – Outdoor

Outdoor pots have a drainage hole and are delivered with rubber feet.

Axel Pot

Its pure shape and various sizes turned this pot into an instant classic for in - and outdoor use. The colour palette will inspire you in every season, be it in spring with flowers, and in winter without plants. AXEL pots are coloured with a coloured silt by 'angoben' with the special property not to 'glaze' during baking. The result is the beautiful matte colour.

Outdoor pots have a drainage hole and are delivered with rubber feet.

Baja

Influenced by nature and its organic forms, Baja highlights nature's aesthetic dimension. The collection refers to the complexity and the playfulness of the organic reality with their irregular and playful lines, shape and texture. It offers the perfect terra cotta solution when looking for a striking and playful accessory in- and outdoors.

Outdoor pots have a drainage hole and are delivered with rubber feet.

Luanda

The Luanda collection was inspired by the structure of the beech. The structure is already integrated into the wall. Both the texture of the material and its deep colours strengthen the feeling of a weathering trunk.

The shapes accentuate its simplicity and strength, while the glazing below gives the pots a reflecting mirror.

Terra Cotta – Outdoor

Outdoor pots have a drainage hole and are delivered with rubber feet.

Milos

The Milos collection is created by the modeling technique of leaving extra finger imprint on the clay whilst turning. The unique sense of naturalness is intensified through the dying process using colored silt by 'angoben', which is known for not glazing during baking, resulting in a beautiful matte finish.

Terra Cotta – Outdoor

Outdoor pots have a drainage hole and are delivered with rubber feet.

Vienna

With its baroque streetscapes, imperial palaces, winding cobbled lanes, sweet Kaffeehäuser (where they serve delicious Sachertorte) and cosy wood-panelled Beisl, Vienna is steeped in history. Yet it's also at the cutting edge of design, architecture, and contemporary art. This perfectly reflects our collection Vienna that looks at the same time new and old.

Terra Cotta Limited

Clubbed into a mall

Here the clay is hit into the mall by hand. This technique is more suitable for bigger pot.

Almond Limited

A collaboration between Domani and Paul Odekerken

As a fruit of their previous collaborations, the Limited collection was born. Paul's craftsmanship and Domani's artistic view resulted in an exclusive collection. Buying a work of the Limited collection is buying a piece of art.

The pots are hand-made and unique. The finishings are pure luxury.

Zinc

Frost proof

Suitable for outside, winter resistant

Zinc

Zinc is like a living work of art. A beautiful, lightweight metal that evolves with every season.

1. Unoxidized zinc

2. Oxidized zinc

3. Oxidized zinc

5. Rain-caused oxidation

Domani zinc items are made out of zinc-titanium plates. Our zinc contains 4% of silver, which makes it extremely durable. When exposed to humidity or water, zinc will naturally oxidize. First it will create a white powder to protect itself, then a beautiful light grey patina will appear. The final patina will vary from piece to piece making each item unique. All our zinc items can be made out of copper.

Cool table

Our 'cool table' is an oval zinc side table. With its built in cooling space it's the ideal party table. Prepare the ice for your aperitif and things can't go wrong.

No stress for the host and hostess, because cool drinks are within reach. Cool table also makes an excellent breakfast table.
